

Glass Cabinets & Counters

Glass cabinets and counters are an essential feature of retail environments. They enable brands and visual merchandising specialists to showcase product ranges as effectively as possible, presenting them in ways which are sure to capture the attention of shoppers and allow them to view any items on display from all angles.

Built using Unibox System – a range of modular aluminium profiles, connectors and accessories designed to enable the creation of ultra-flexible display equipment – our cabinets and counters can be engineered in shapes, sizes, configurations and material finishes to best serve the goals of different store environments.

Inspiration

Thanks to the inherent versatility of modular construction systems, we are able to create glass cabinets and counters that are optimised to perform according to brand-specific needs. Our team has over 30 years of experience in providing standard, customised and bespoke solutions for use in environments of all types.

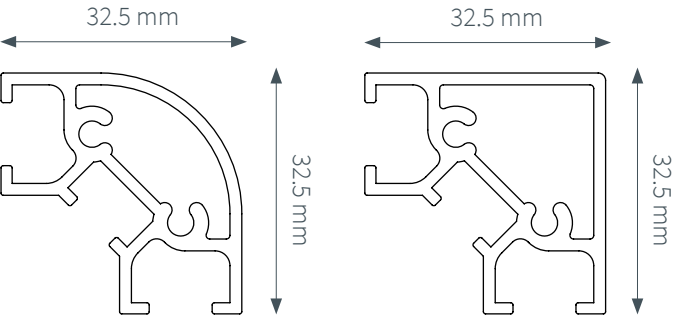

Elite

A range of squared and rounded showcases, counters and cabinets with a designer finish. With satin silver, 32.5mm aluminium profile, door locks and counter knuckles, the range can be tailored to the required brand colours.
